

Evolve™ LED R150

Street/Roadway

The GE Evolve™ LED Series Roadway Medium Cobrahead provides good pavement uniformity, effective glare control, and reduced light trespass. The Evolve light engine consists of nested concentric directional reflectors that minimize the visibility of discrete LEDs. Low-profile, die-cast housing with easy access to driver and light engine.

Judging Comments

The judges appreciated the Evolve's unique design for incorporating superior house-side cut-off optics with good color qualities. The judges also noted that the Evolve's one source of luminance without visible individual LEDs was especially attractive.

Luminaire Testing (54 LED model)

- Light Output: 4900 lumens
- Power: 91.0 watts
- Efficacy: 53.8 lm/W
- CCT: 4100K, CRI: 65
- Testing Laboratory: GE Consumer & Industrial (CALiPER recognized) – Report #0980103
